

Orbost Gas Plant Project. Christmas Update.

The team at APA is wrapping up a big year of activity at the Orbost Gas Processing Plant. The commissioning and start-up works continue and we are moving closer to a fully operational plant.

"The commissioning and start-up program of works is at an exciting stage of the project as it signals that we are approaching construction completion and moving into full operations," said APA Project Director Alex Kristovskis. "It is the culmination of over four years of project development work, including over 2.5 years of detailed engineering, procurement, fabrication and construction to arrive at this point."

The work crews and plant team will continue working through the Christmas period and into the New Year.

"We would like to give our sincerest thanks to the Orbost and surrounding communities for continuing to welcome our people and supporting the works taking place at the plant," said APA Manager of Approvals and Community Liaison Peter Turnbull.
