

Wallumbilla Compression Facility – Restricted Gas Specification (WCF-B)

Receipt and Delivery Points

Receipt Points

Name	Location	Pressure (kPa)	Physical Capacity (GJ/Day) [see note 1]	Zone [see note 2]
WCF-B LP Receipt Point	A virtual point, located in the suction (low pressure) header within APA's Wallumbilla Compound	Minimum: 8,200 Maximum: 10,200	350,000	WCFB-RZ-01

Delivery Points

Name	Location	Pressure (kPa)	Physical Capacity (GJ/Day) [see note 1]	Temperature (°C)	Zone [see note 2]
WCF-B HP Delivery Point	A virtual point, located in the discharge (high pressure) header within APA's Wallumbilla Compound.	Minimum: 10,200 Maximum: 15,300	350,000	0 to 60	WCFB-DZ-01

Note 1: Hourly Physical Capacity unless otherwise stated is the Physical Capacity at the point divided by 24 and multiplied by the MHQ Factor for the Facility as set out in Schedule 10 of the Facility Specific Terms.

Wallumbilla Compression Facility – Restricted Gas Specification (WCF-B)

Receipt and Delivery Points

Note 2: Zones descriptions are accurate as at January 2019, however are subject to change in accordance with the National Gas Rules. The zone information published in the AEMO Transportation Service Point Register prevails in the event of an inconsistency.
