

## MEDIA RELEASE

# APA GROUP LAUNCHES EXPRESSION OF INTEREST FOR THE POTENTIAL SUPPLY OF BIOMETHANE

20 March 2024

APA Group has today launched an expression of interest (EOI) to biomethane suppliers as its Pathfinder Program continues to look to future opportunities for future fuels to support ongoing operational decarbonisation.

The biomethane EOI process will gather information on potential biomethane supply chains, including suppliers, production projects and volumes.

APA Group General Manager Future Energy, Caroline Beattie said the EOI would allow APA to understand potential pathways to the establishment of domestic biomethane supply chains that can support the decarbonisation of APA's operations.

"The biomethane industry is only in its infancy in Australia, so this process will help APA consider potential opportunities to partner with organisations in industries such as waste management, wastewater and agriculture," she said.

"The EOI process and ongoing engagement with potential partners will allow us to better understand possible supply chains and potential application in areas like the decarbonisation of compressor stations across our gas transmission network.

"APA's strategy is to be the partner of choice in delivering infrastructure solutions for Australia's energy transition and we will also use these insights as we continue to engage customers to support energy transition."

Following the expression of interest process, APA will consider whether it will pre-qualify a list of potential suppliers for further engagement.

### About APA Group (APA)

APA is a leading Australian Securities Exchange (ASX) listed energy infrastructure business. We own and/or manage and operate a diverse, \$27 billion portfolio of gas, electricity, solar and wind assets. Consistent with our purpose to strengthen communities through responsible energy, we deliver approximately half of the nation's gas usage and connect Victoria with South Australia, Tasmania with Victoria and New South Wales with Queensland through our investments in electricity transmission assets. We also own and operate renewable power generation assets in Australia, with wind and solar projects across the country. APA Infrastructure Limited is a wholly owned subsidiary of APA Infrastructure Trust and is the borrowing entity of APA Group. For more information visit APA's website, [apa.com.au](https://apa.com.au).
