¹ The weighted average prices listed here are calculated from prices and services under contract 1 July 2019 – 30 June 2020. They reflect the prices in contracts in place at the time. The standing prices are current as at 1 January 2020. In comparing the standing price with the listed weighted average prices, note that the weighted average prices reflect the volume weighted average of tariff escalations applying to prices charged in the reporting period, whereas the Standing price reflects a single price point applying at the midpoint of the period. Further details on the weighted average prices can be found in the 2020 Part 23 Financial Reporting file link, and associated Basis of Preparation document, published on this website for each pipeline listed. These can be found on the relevant pipeline webpage, accessible from apa.com.au/our-services/gas-transmission/.

² Firm volumetric-based weighted average prices listed here should be added to the Firm capacity-based charge to derive a weighted average price for the firm service that is comparable to the capacity-based standing tariff.

About APA Group (APA)

APA is a leading Australian energy infrastructure business, owning, managing or operating a portfolio of energy assets worth around \$22 billion. Its gas transmission pipelines span every state and territory on mainland Australia, delivering approximately half of the nation's gas usage. APA has direct management and operational control over its assets and the majority of its investments. APA also holds ownership interests in a number of energy infrastructure enterprises including SEA Gas Pipeline, SEA Gas (Mortlake) Partnership, Energy Infrastructure Investments and GDI Allgas Gas Networks.

APT Pipelines Limited is a wholly owned subsidiary of Australian Pipeline Trust and is the borrowing entity of APA Group. For more information visit APA's website.
