

# Pilbara Energy Pipeline

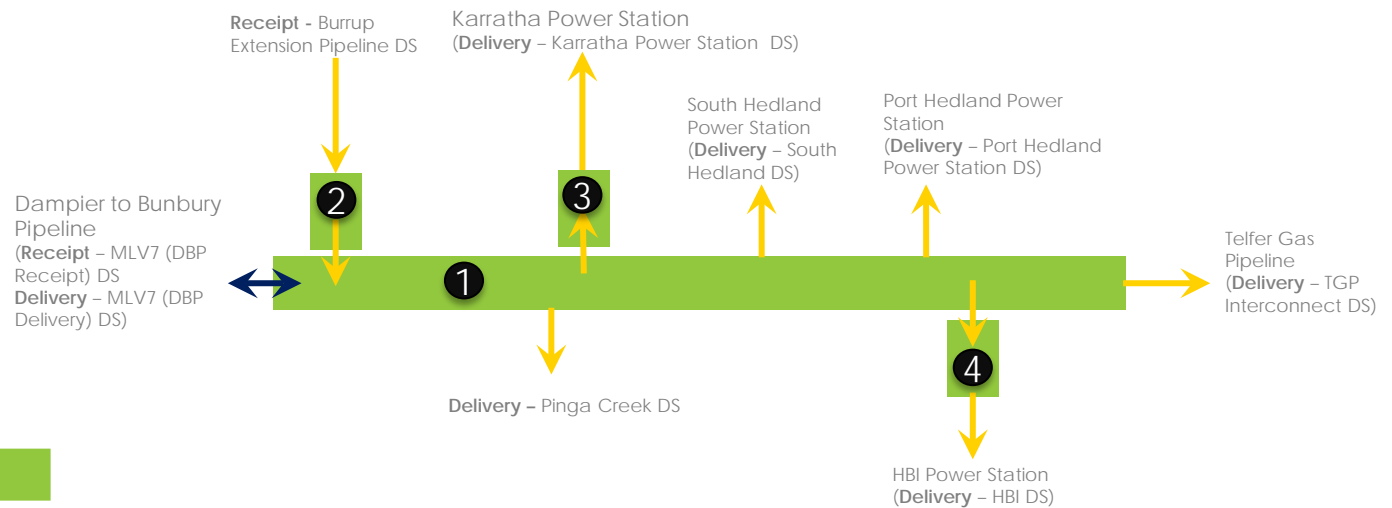

## Legend

## naming convention:

Connecting Facility (Delivery / Receipt point)

| Nameplate Capacities |                            |          |
|----------------------|----------------------------|----------|
| 1                    | PEP Mainline (Easternhaul) | 166 TJ/d |
| 2                    | Burrup Extension           | 166 TJ/d |
| 3                    | Karratha Lateral           | 33 TJ/d  |

| Receipt Point Pressures  |                            | Point | Value      |
|--------------------------|----------------------------|-------|------------|
| Min Pressures            | MLV7 (DBP Receipt)         |       | 7,400 kPa  |
|                          | BEP Receipt                |       | 7,600 kPa  |
| Max Pressures            | MLV7 (DBP Receipt)         |       | 10,200 kPa |
|                          | BEP Receipt                |       | 10,200 kPa |
| Delivery Point Pressures |                            |       |            |
| Min Pressures            | MLV7 (DBP Delivery)        |       | 7,400 kPa  |
|                          | Karratha Power Station     |       | 5,900 kPa  |
|                          | Pinga Creek                |       | 3,500 kPa  |
|                          | South Hedland              |       | 3,500 kPa  |
|                          | Port Hedland Power Station |       | 3,500 kPa  |
|                          | HBI                        |       | 3,500 kPa  |
|                          | TGP Interconnect           |       | 3,500 kPa  |
| Max Pressures            | MLV7 (DBP Delivery)        |       | 10,200 kPa |
|                          | Karratha Power Station     |       | 10,200 kPa |
|                          | Pinga Creek                |       | 10,200 kPa |
|                          | South Hedland              |       | 10,200 kPa |
|                          | Port Hedland Power Station |       | 10,200 kPa |
|                          | HBI                        |       | 10,200 kPa |
|                          | TGP Interconnect           |       | 10,200 kPa |
| Locational MDQs          |                            | Point | Value      |
| Receipt Point MDQs       | MLV7 (DBP Receipt)         |       | 172 TJ     |
|                          | BEP Receipt                |       | 172 TJ     |
| Delivery Point MDQs      | MLV7 (DBP Delivery)        |       | 0 TJ       |
|                          | Karratha Power Station     |       | 33 TJ      |
|                          | Pinga Creek                |       | 3.1 TJ     |
|                          | South Hedland              |       | 34.5 TJ    |
|                          | Port Hedland Power Station |       | 34.5 TJ    |
|                          | HBI                        |       | 18 TJ      |
|                          | TGP Interconnect           |       | 24.9 TJ    |
